

Colour Management Policy

BCQ Group Ltd ensures that the colour quality policy represents the quality policy as far as the colour quality system is concerned.

BCQ Group Ltd is using the ISO 12647-2 BPIF Scheme Certification Requirements version 2 for the implementation of the scheme where applicable.

BCQ Group Ltd is using the ISO standard 12647-2 and the lithographic printing process as the method of production within the scope of the certification. The 12647-2 procedures are used to demonstrate compliance.

BCQ Group Ltd is using the percentage scoring systems weightings and the scoring system calculation as required by version 2 of the BPIF scheme.

Our aim is to ensure customer satisfaction through accurate colour reproduction and consistent quality against calibrated proofs for all jobs produced to the ISO 12647 -2 standard.

BCQ Group Ltd ensures the training, development and maintenance of the competence of all personnel within the scope of the colour quality and the production management system. BCQ Group Ltd ensures the provision of the necessary infrastructure and equipment needed for the production of compliant products.

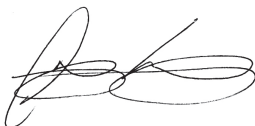

BCQ Group Ltd undertakes reviews on a regular basis of the capabilities of the infrastructure and equipment employed in the light of technological and other changes as they become available.

BCQ Group Ltd ensures the policy detailed above is communicated within the business and made available to all interested parties.

The master copy is retained by the Colour Champion. A copy is available in reception and also the pre-press office for staff members to refer to.

BCQs Colour Management Policy is also available on its company website along with other useful information for ISO12647-2
